Experience the Power of Clinical Genetic Testing

Portugal, USA, Spain

www.cgcgenetics.com

November 2017
25 YEARS OF EXPERIENCE IN MEDICAL GENETICS

CGC Genetics is one of Europe's leading laboratories in Clinical Genetics and a leader in Medical Genetics tests in Portugal. It has also facilities in Spain and the USA.

MISSION
For 25 years our main goal has been to provide the healthcare community with the most advanced diagnostic tools in Medical Genetics, using vanguard technologies and strict quality policies.

INTERNATIONAL REFERENCE LAB IN GENETICS
More than 3,800 entries in Genetics test directories (Orphanet, Genetic Testing Registry (NCBI) and GeneTests), and the exclusive provider of diagnostic tests for some rare diseases.
QUALITY AND AWARDS

Working daily to be an international reference
EXTERNAL QUALITY CERTIFICATIONS

Since 2015
National program for the external evaluation of laboratory quality
(Portugal)
Cytogenomic External Quality Assessment Service

Since 2014
Clinical Laboratory Improvement Amendments (CLIA) - CERTIFICATION

Since 2014
RD&I Certification

Since 2009
State of California – Clinical Laboratory License

Since 2009
Fetal Medicine Foundation

Since 2008
Clinical Laboratory Improvement Amendments (CLIA) - REGISTRATION

Since 2007
Cytogenetic European Quality Assessment

Since 2006
ISO # 9001

Since 2004
Cystic Fibrosis European Network

Since 2004
Quality Control for Molecular Diagnosis

Since 2002
European Molecular Biology Quality Network

Since 2001
Quality control from Asociación Española de Diagnóstico Prenatal

Since 1997
Spanish and Portuguese group - International Society of Forensic Genetics

Since 1995
United Kingdom National External Quality Assessment Scheme in Clinical Cytogenetics

OUR CLIENTS

Committed to Excellence
**Hospitals**
CGC Genetics offers genetic testing to all medical specialties both to public and/or private healthcare, working with prestigious hospitals in different countries who demand a superior quality.

**Laboratories**
CGC Genetics serves both clinical or genetic laboratories all over the world.

**Medical Insurances**
In Portugal and Spain CGC Genetics collaborates with most health insurance companies.
Receiving samples every day from more than 60 countries
Dedicated customer service helps clients select the most appropriate clinical genetic test and assists in the interpretation of the results.

- Team of 5 Medical Geneticists
- CGC Genetics has ALL available technologies for the most recent genetic diagnostics
- Competitive pricing
- Innovation through new diagnostic products
- Rapid flexibility to customize multiplex panels:
  - Clinically relevant
  - Cost effective
WHAT WE DO

Focus on prevention by early genetic diagnostics
CLINICAL DEPARTMENT
5 Medical Geneticists

OUR LABORATORIES

- MOLECULAR DIAGNOSTICS
- CLINICAL GENOMICS
- CYTOGENETICS
- ANATOMIC PATHOLOGY
- PRENATAL SCREENING

- Our labs currently offer a large portfolio of over 4,000 genetic tests
- CGC Genetics has the capacity to participate in Clinical Trials coordinated by major pharmaceutical companies
More than 4000 Genetic Tests for All Medical Specialties

- Pediatrics
- Obstetrics
- Prenatal Screening
- Gynecology
- Hematology
- Oncology
- Cardiology
- Endocrinology
- Reproductive Medicine
- Infertility
- Otorhinolaryngology
- Gastroenterology
- Rare Diseases
- Pharmacogenomics
- Pneumology
- Obesity
- Nephrology
- Neurology
- Ophthalmology
- Dental Medicine
- Medical Genetics
CGC Genetics has ALL available technologies for the most recent genetic diagnostics.
OUR SERVICES

New Diagnostic Approaches in Clinical Genetics
ARRAY CGH
CGC Genetics, with 25 years of experience in cytogenetics, provides chromosomal microarray analysis using the most comprehensive and robust technology available (CytoScan®, Affymetrix®).

OFFERING TWO DIFFERENT RESOLUTIONS:

- CytoScan® 750K (750,000 markers)
- CytoScan™ HD (2,700,000 markers)

ADVANTAGES
CGC Genetics offers higher analytical resolution with clinical interpretation by our Medical Geneticists.

This convergence of resources meets the most complete quality programs corresponding to European gold standard in the field of Medical Genetics.
NGS
Next generation sequencing (NGS) allows the sequencing analysis, in a single test, of a gene, several genes (panel) or the whole exome.

ADVANTAGES

- Higher sequencing capacity
- Higher quality, speed and performance
- Comprehensive diagnostic panels
- Reduced turnaround time for large genes

Offering more than 250 NGS Panels for all medical specialties.
DISEASE EXOME
Disease Exome by CGC Genetics is a sequencing panel that screens 6,000 clinically relevant genes. This panel is a diagnosis tool for patients with a complex or unclear phenotype.

ADVANTAGES
• High diagnostic yield
• Targets clinically relevant genes
• Excellent coverage of analyzed genes

WES BY CGC GENETICS (WHOLE EXOME SEQUENCING)
Whole Exome Sequencing, which analyzes the entire exome with sequencing of about 20,000 genes; using the most advanced technology available. The thousands of variants detected are analyzed integrating the clinical phenotype. CGC Genetics recommends WES TRIO, i.e., performing WES in both the patient and the parents.

ADVANTAGES
• Solves complex diagnostic cases
• Maximum diagnostic yield currently available
• Identification of new disease causing genes

Reports with clinical interpretation and integration of the results by our Specialists in Clinical Genetics
Confirmation of causal variants by Sanger sequencing
Short Turnaround Time
TOMORROW PRENATAL TEST
New test CGC Genetics that detects as early as 10 weeks of pregnancy:

- T21 (DOWN SYNDROME)
- T18 (EDWARDS SYNDROME)
- T13 (PATAU SYNDROME)
- Fetal Gender Identification
- Sex chromosome aneuploidies:
  - Monosomy X, XXX, XXY, XYY

ADVANCED TECHNOLOGY
Maternal and fetal circulating DNA fragments, present in maternal blood, are analyzed through Next Generation Sequencing (NGS) technology.

Afterwards, the number of sequences correspondent to each chromosome are aligned and analyzed through a complex bioinformatic analysis.
Support to the Ordering Physician and Clinical Integration of Laboratorial Results

CGC Genetics has a Clinical Department with 5 Specialists in Medical Genetics.

More than 80 highly qualified geneticists work in our laboratories.

Laboratory results are interpreted by medical geneticists that assess the clinical relevance of the genetic variants found.
